

Sojeong Park

Data Analyst focused on building scalable data pipelines, dashboards, and actionable insights for business performance
London, UK | sojeongpark.data@gmail.com | 07355-630524 | [linkedin.com/in/sojeongdata](https://www.linkedin.com/in/sojeongdata) | <https://data-sj.vercel.app/>

Eligible to work in the UK under the Youth Mobility Scheme visa (2 years). No sponsorship required.

Overview

Data Analyst specialising in automation-driven data systems, multi-source integration, and actionable reporting. Proven track record of delivering end-to-end data solutions independently, from pipeline architecture to stakeholder dashboards, across marketing, product, and operations. Now seeking a data analyst role in a product, marketing, or growth-focused environment, where established data infrastructure and cross-functional teams can be leveraged to deliver insight at scale.

Key Achievements

- Achieved 300%+ Average SMS CRM ROAS across 89k+ messages through targeted segmentation and optimisation
- Reduced CRM campaign preparation time **by 80%** across a **46k+ customer database**, improving team efficiency
- **Unified 70k+ records** across multiple data sources, improving data consistency and reliability
- **Reduced monthly reporting time by 1+ day** and accelerated decision-making through automated dashboards

Experience

Data Analyst, Marketing Team *HIGH-TECHER, Seoul*

Sep 2024 – Nov 2025

Promoted from an Intern to the first Data Analyst in the marketing team

- Eliminated manual marketing bottlenecks by architecting automated pipelines, CRM systems, and reporting dashboards from scratch, cutting campaign preparation time by 80%
- Scaled CRM segmentation and automation across a 46k+ customer database, replacing entirely manual targeting workflows and cutting per-campaign setup time from days to hours in SMS-based lifecycle campaigns
- Established an RFM-based segmentation framework, standardising customer prioritisation and enabling non-technical marketers to independently analyse and target customer groups
- Drove 1,104% ROAS across 27 CRM campaigns over 9 months by combining RFM segmentation, send-time optimisation, and behavioural insights to maximise ROI at each lifecycle stage
- Eliminated engineering dependency entirely by building self-serve automated pipelines (API → data processing → BI dashboards), removing up to 3-day wait times for data access and enabling real-time daily performance tracking
- Automated data collection and processing workflows using Python, Playwright and Google Apps Script, removing recurring manual tasks and enabling any team member to access up-to-date data without engineering involvement
- Integrated 70k+ records across (Sales, CRM, ad performance, social media performance), establishing a reliable single source of truth for performance analysis
- Built stakeholder-facing KPI dashboards using BI tools (Looker Studio), delivering a single source of truth for 12 users, replacing manual reporting workflows and accelerating data-informed decision-making

Associate Manager *Newtown Electric Construction Co., Ltd., Seoul*

Aug 2020 – Mar 2024

- Managed day-to-day operations, documentation, and stakeholder communication. Developing a strong eye for accuracy and process consistency.

Software Engineer *Porters Corporation, Tokyo / ROUE GARCON Co., Ltd., Tokyo*

Aug 2018 – Jul 2020

- Developed unit tests and conducted QA using Selenium and JUnit in an Agile/Scrum environment
- Analysed server-side user logs in a Linux/AWS environment, reported weekly performance for senior stakeholders
- Bridged communication across a multilingual team (Korean, Japanese, English)

Education & Professional Training

Big Data Analysis Marketing Professional Course *Seoul Metropolitan Government, Seoul*

Apr 2024 – Sep 2024

Pharmaceutical consumer insight & campaign effectiveness hands-on project

- Influenced a strategic shift in marketing approach by delivering insights to 16 stakeholders
- Identified limited long-term brand awareness impact across 5 brands using ~10k records from a 6-month dataset
- Validated campaign effectiveness using 3 years of data and identified 5-year keyword trends
- Reduced data preparation time by 5 days by standardising workflows across an 8-member team

Full Stack Web Development Professional Course *Korea International Trade Association, Seoul*

Sep 2018 – Jul 2019

Associate degree in Tourism Management *Korea Tourism College, Icheon, South Korea*

Feb 2011

Core Skills

- **Data Quality, Integration:** Validation, reconciliation, multi-source integration, and workflow optimisation
- **Technical Tools:** Python, SQL, Excel, Google Sheets, Google Apps Script, REST APIs, JSON, XML
- **Visualisation & Reporting:** Looker Studio, Tableau, Power BI; stakeholder-facing dashboards
- **Collaboration & Delivery:** Cross-functional collaboration, requirements definition, data reliability improvement
